DEVELOPING SUSTAINABLE ENERGY USE IN MONTENEGRO

PROJECT FACT SHEET

PROJECT OBJECTIVE

To contribute to the further energy reforms in Montenegro in order to comply with obligations from the European Union energy acquis.

PROJECT PURPOSE

The main purpose of the project is to develop and enforce relevant regulatory framework in order to increase sustainable energy use, with a focus on transport sector.

MAIN RESULTS

- ✓ Studies analyzing and defining potential for use of renewable energy sources and energy efficiency measures in transport sector;
- ✓ Updated legislation and regulatory framework for sustainable energy use in transport, with an action plan defining measures and projects to be realized;
- ✓ Improved monitoring of production of biofuels and use of energy in transport sector, in accordance with EU energy policy and implementation of top priority measures;
- ✓ A study defining economic and strategic solutions for fulfilling the European Union obligation of 90-day crude oil reserves;
- ✓ A study defining the potential and examples of use of high-efficiency cogeneration, with an action plan for its development;
- ✓ Advising on changes in EU energy policy in order to increase sustainability and security of overall energy sector in Montenegro;
- ✓ A detailed training for governmental staff on national and local level and awareness raising campaign in order to increase knowledge of EU energy policy and good practices, as well as explain benefits Montenegro can have through development of sustainable energy sector.

QUICK FACTS

Project Title:

Developing Sustainable Energy Use
(EuropeAid/132799/C/SER/ME)

Project Location:

Montenegro

Project Duration:

24 months (April 2015 – April 2017)

Contracting Authority:

The Delegation of the European Union to
Montenegro

Main Beneficiary:

Ministry of Economy of Montenegro

Project implemented by:

European Profiles S.A in consortium with
EPTISA Servicios de Ingenieria
